# Explosion-proof ATEX smartphone

## Working more efficiently

Smartphones have become an integral part of our daily lives. And with the recent technological developments and enormous expansion of mobile applications, they have also become integral to industry.

You can use (ATEX) smartphones to digitise and increase the efficiency of various processes. Examples are work preparation, project planning, service and malfunctions, inspections and testing, safety, time registration, declarations and education. For example, the digitisation of your licences prevents waiting at the licensing office and avoids the loss of important documents.

Our robust ATEX smartphones can be used in ATEX-regulated environments. You can install various applications on the smartphone that contribute to more efficient business processes, ease of use and safety.

We supply our ATEX smartphones with a SIM card that includes unlimited calling in the Netherlands and a huge 10 GB data bundle, so you won't have to worry about unexpected costs. Moreover, the SIM card will be valid throughout the rental period.

Mobile Device Management (MDM) enables you to monitor the integrity of your ICT infrastructure and prevent the undesirable dissemination of confidential information. You can decide whether or not to allow certain apps to be used, thus ensuring efficiency and safety.

| RENTAL PERIOD - PRICES PER DAY | DAY | WEEK | MONTH | 2 MTHS | 6 MTHS | 1 YEAR |
|---|---|---|---|---|---|---|
| ATEX smartphone | € 55.00 | € 21.00 | € 15.00 | € 12.00 | € 6.00 | € 4.30 |
